## DETAILED ACTION

1. Claims 1 – 30 are presented for examination.

### *Double Patenting*

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-30 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-74 of copending Application No. 09/709,505 [ hereinafter '505 application ], claims 1-74 of copending Application No. 09/709,506 [ hereinafter '056 application ], and claims 1-51 of copending Application No. 09/736,223 [ hereinafter '223 application ]. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reasons:

Art Unit: 2154

Taking claim 1 as an exemplary claim, the '505, '506, '223 applications contain the subject matter claimed in the instant application. As per claim 1, all applications are claiming common subject matter, as follows:

A method for remotely extracting and storing computer related information across a network, said method comprising:

- establishing a communication link ...;
- downloading a software module ...;
- transferring a first directive file ...;
- said remote server system ...;
- receiving from said software module ...;
- transferring a third directive file ...;
- said remote server ...; and
- said remote server system parsing ....

The claim of '505, '506, '223 applications do not specifically disclose the same process steps performed as described in the claim 1 of instant application but it would have been obvious for a person skill in the art to recognize that the claims are similar because they perform the functions of parsing and processing instruction to achieve the purpose of transferring information from one device to another.

As per independent claims 13, and 23, they are also directed to the same subject matter recited in claim 1 above. Accordingly, they are provisionally rejected under the judicially created doctrine of obviousness-type double patenting.

As per dependent claims 2-12, 14-22, 24-30, of instant application, they contain similar subject matter as claims of the '505, '506, and '223 applications. Accordingly, they are provisionally rejected under the judicially created doctrine of obviousness-type double patenting.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

**4. THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
